

THRESHOLD

Digital Storefront & Quote Engine

A proposal prepared for
Luxurysecuritydoors

Prepared by Justdavidtech | July 2026

EXECUTIVE SUMMARY

A Price Before a Phone Call

Luxurysecuritydoors builds and installs some of the finest security doors in the market. The current website shows that craftsmanship, but it does not sell it. There is no instant pricing, no structured catalog, and no way for a visitor to move from browsing to buying without first messaging in and waiting for a reply.

Threshold is a complete digital storefront built to close that gap: a premium public site, a structured product catalog, an instant quote engine, and an admin command center, unified in one platform and delivered in clear, sequential stages.

6 PACKAGE TIERS	10 DOOR CATEGORIES	6 DELIVERY STAGES	100% BESPOKE BUILD
---------------------------------------	--	---	--

THE PROBLEM

The Current Site Shows Doors. It Does Not Sell Them.

A photo gallery on a template theme can showcase craftsmanship, but it cannot close a sale the way a structured storefront can.

ISSUE 01

No Instant Pricing

Buyers cannot gauge whether a door fits their budget without messaging in first. Most simply leave before ever making contact.

ISSUE 02

Unstructured Catalog

A photo grid is not a shopping experience. There is no way to filter by material, size, or use case, so browsing feels like scrolling, not choosing.

ISSUE 03

Manual Restocking

Every new door design, price change, or sold out item currently requires a developer to update the site, slowing the business down.

ISSUE 04

Slow, Unoptimized Pages

Heavy, uncompressed product images hurt both search ranking and mobile load times, right where most buyers in this market are browsing.

"Every visitor who leaves without a price never becomes a customer."

THE SOLUTION

Four Integrated Subsystems. One Unified Platform.

Every component is engineered to work in absolute synchronicity, from the public storefront to daily catalog management.

SUBSYSTEM A

High Fidelity Storefront

A premium, animated public website that communicates craftsmanship and drives client acquisition, with bespoke motion, interactive modals, and full mobile responsiveness.

SUBSYSTEM B

Structured Catalog Engine

A filterable product catalog with individual pages per door, organized by material, size, and use case, so browsing turns into shopping.

SUBSYSTEM C

Instant Quote Engine

A real time calculator that turns door type, size, material, and finish into a price range, then hands the lead straight to WhatsApp.

SUBSYSTEM D

Admin Command Center

A private dashboard where staff manage products, prices, and stock status, and track every quote request from submission to sale.

INSTANT QUOTE ENGINE

A Price Before A Phone Call

Visitors select a door type, material, size, and finish, and get a real, live estimate in seconds. No account, no waiting on a reply. Just enough information to decide whether to reach out.

- ✓ Real time price range generated from the live catalog, not a guess
- ✓ "Get Exact Quote on WhatsApp" auto fills the visitor's selections
- ✓ Optional photo upload of the existing doorway for a sharper estimate
- ✓ Every quote request logged and tagged, never lost in a chat inbox
- ✓ Financing and installment messaging shown where it applies
- ✓ Admin can adjust base pricing at any time, no redeploy required

PRICING

Six Packages. One Perfect Fit.

Every package is fully self contained. Choose what the business needs today and upgrade at any time. Figures below are starting points for discussion, not final quotes.

Package	Focus	One Time Fee	Monthly
Starter	Professional Storefront Foundation	NGN 350,000	NGN 40,000
Standard	High Fidelity Interactive Experience	NGN 550,000	NGN 60,000
Premium	Structured Product Catalog Engine	NGN 850,000	NGN 80,000
Gold	Instant Quote Engine	NGN 1,100,000	NGN 100,000
Platinum	Admin Command Center	NGN 1,400,000	NGN 130,000
Diamond	Full Brand Identity Suite	NGN 1,700,000	NGN 150,000

Each package is cumulative: every tier includes everything in the tier before it. Full feature breakdowns follow on the next pages.

PACKAGE DETAIL 1 / 3

- ✓ Business card design with QR code linking to the site
- ✓ Company flier in two layout variants
- ✓ Corporate letterhead for invoices and correspondence
- ✓ Downloadable product catalog PDF, generated from live catalog data
- ✓ Brand color palette and typography guide
- ✓ All assets in print ready and digital formats
- ✓ Full system deployment and brand handover

WHY IT CONVERTS

Built to Sell, Not Just Impress

Every layer of Threshold is engineered around one question: does this get a visitor closer to a WhatsApp message, or further away?

Instant WhatsApp Handoff

Every product, quote result, and call to action funnels to WhatsApp with a pre written message, matching how doors actually get sold in this market.

Structured Lead Capture

Quote requests are logged, not lost in a chat thread. Staff can see who asked for what, and when, and follow up before the lead goes cold.

Speed and Search Visibility

Compressed, optimized images and clean metadata mean faster mobile load times and stronger placement in search results, both directly tied to sales.

Verified Trust Signals

Real Google Reviews, project counters, and on site installation photos replace generic stock testimonials, so trust is earned before the first call.

OUR PROCESS

Structured Delivery. Zero Surprises.

Every project is delivered in clear, sequential stages, with review and approval at each milestone before we proceed.

01 Architecture and Theme Setup

Core styling, responsive layout grids, brand color system, typography integration, and loading animations.

02 Catalog Data Modeling

Product schema, categories, image pipeline, and pricing structure for every door type. Premium and above.

03 Quote Engine and Lead Capture Build

Calculator logic, price ranges per category, WhatsApp handoff, and photo upload lead capture. Gold and above.

04 Admin Dashboard and Catalog Manager

Full administrative dashboard, product uploader, pricing and stock controls, and the lead and quote manager. Platinum and Diamond.

05 Brand Identity Suite

Logo, business card with QR code, flier designs, letterhead, and catalog PDF. Diamond package only.

06 Final Auditing and Deployment

Cross browser and mobile responsiveness testing, speed audit, and full deployment with SSL and handover.

WHY THRESHOLD

The Returns Are Immediate and Lasting

Competitive Differentiation

Positions the business as the premium option in a crowded, mostly generic market. Buyers notice before the first message.

Faster Buyer Decisions

The quote calculator answers the "can I afford this" question instantly, instead of losing the visitor to a contact form.

Reduced Admin Time

Staff manage products, prices, and stock themselves. No more calling a developer for every catalog update.

Higher Quality Leads

Every quote request arrives pre qualified with a product, size, and price range attached, not a vague message.

Stronger Search Visibility

Compressed images and automated SEO metadata improve ranking for the exact searches buyers are already making.

Scalable Inventory

Built on cloud hosted infrastructure. As the catalog grows, the system scales without new hardware or rewrites.

THE ARCHITECT BEHIND THRESHOLD

Hi, I'm David, Founder of Justdavidtech

I design and build complete digital systems for product led businesses, not just websites, but full operational infrastructure. Every project I take on is treated as a long term partnership: I build it, deploy it, and stay on to maintain and grow it alongside the business.

Threshold is the product of real engineering work: structured product catalogs, real time quote engines, administrative dashboards, and high fidelity interfaces, all built from the ground up and proven in production. When you work with Justdavidtech, you are working directly with the person who builds, secures, and supports the system.
